

Alliance AutoGas proudly offers an EPA certified bifuel solution, reducing range anxiety for our fleets by allowing them to refuel with either propane autogas or gasoline. Offered at zero upfront cost, our systems are installed by Certified Conversion Centers with trained autogas technicians to deliver quality results.

With a wide range of vehicle platforms, we handle everything from the conversion technology and infrastructure to refueling, training and maintenance. In addition, we offer our own “plug and play” System, which significantly reduces cost and conversion time.

## BENEFITS OF THE PLUG AND PLAY SYSTEM:

- Dramatic CO<sub>2</sub> emissions reduction- helps fleet managers meet and surpass sustainability initiatives for medium and heavy-duty truck fleets
- System is certified with the U.S. Environmental Protection Agency (EPA) and National Fire Protection Association’s (NFPA) 58 standards
- Labor time cut in half and conversion costs are significantly reduced
- The conversion system is supported by a 5-year, 100,000 mile warranty
- Zero intrusion on the vehicle’s original fuel tank

Our bifuel conversion systems do not void the current warranty on your vehicle, and we also offer our own 5-year, 100,000 mile warranty on our Plug and Play systems just to prove how confident we are.
